(54) Title: DEVICE FOR FIXING AN ADAPTER FOR AN ADD-ON PIECE TO A CONDENSER

(57) Abstract: A device (1) for fixing an adapter (3) for an add-on piece to a condenser provided with lamellae that are deformable between coolant conduits comprises an adapter-supporting piece (2) provided with the adapter (3) for the add-on piece. An opposite piece (5) is also present. The adapter-supporting piece (2) and the opposite piece (5) comprise a number of facing, wedge-shaped protrusions (11, 13). Implemented on the adapter-supporting piece (2) and on the opposite piece (5) is a locking arrangement (6) for connecting the adapter-supporting piece (2) and the opposite piece (5) to each other. When the adapter-supporting piece (2) and the opposite piece (5) are connected, the protrusions (11, 13) engage in and thereby deform the lamellae of the condenser. Stable securing of this device (1) is procured by this means in combination with the connection formed by the locking arrangement (6).
